

Better data leads to better outcomes.

Physio-Control Data Solutions

Improving care every step of the way.

Better Tools

For more than 60 years, Physio-Control has developed technology and devices that help first responders and clinical care providers save more lives. We listen to our customers and refine our products to align with their needs. As a result, our products and services set the standard for the entire industry.

Better Information

But industry-leading tools aren't enough. On-demand access to essential information is the cornerstone of 21st Century medicine, and Physio-Control is dedicated to offering faster, easier connectivity between people, devices and information. Automation of data collection and movement helps care teams assemble quickly, debrief efficiently and improve performance between events.

Better Outcomes

Physio-Control offers end-to-end support for caregivers, even as patients are handed off from one team to another. Continuous monitoring makes a real difference in patient outcomes—and it makes reporting and benchmarking that much easier after the fact.

The Physio-Control ecosystem.

It often takes more than one device to save a life. We've got you covered across the continuum of care, with a range of products and services that work together to ensure quick communication, simple reporting and more efficient use of caregiver time.

PulsePoint Respond

BYSTANDER EMPOWERMENT APPS

PulsePoint Respond enables 911 operators to alert bystanders near sudden cardiac arrest victims. This smartphone app also gives real-time CPR coaching and helps bystanders locate AEDs, thus empowering communities to improve survival rates in their community and making heroes out of everyday people.

CODE-STAT™

POST-EVENT DATA REVIEW SOFTWARE

Make it easy for caregivers to learn from every cardiac event. CODE-STAT software simplifies post-event review and enables ongoing provider education. When it comes to quality improvement, our motto is measure, review, report, repeat.

LIFEPAK®

MONITOR/DEFIBRILLATORS

Our flagship monitor/defibrillators have a rich history—and a bright future—as an essential component of the Physio-Control ecosystem. All the data captured during an emergency response flows quickly and seamlessly to care teams, quality teams, clinical managers and administrators.

HomeSolutions.NET®

HOME HEALTHCARE AGENCY
MANAGEMENT SYSTEM

Effectively manage patients post-event with the HomeSolutions.NET agency management system, proven to help post-acute care providers improve clinical, operational, financial and regulatory performance.

HealthEMS®

PATIENT MANAGEMENT SYSTEM

The HealthEMS System helps first responders accurately track patient care as they deliver it, and it ensures that hospital-based providers get the critical information they need. With the intuitive interface for tablet devices, the care documentation and post-event review process is faster and simpler than ever.

Clinical Performance Solutions

Physio-Control is committed to working with you to build the right network of tools and services to meet your unique needs. Our decades of experience and deep clinical knowledge mean, no matter how complex the problem, our team is equipped to help you find exactly the right solution.

LIFENET® System

EMERGENCY READINESS AND RESPONSE SYSTEM

The LIFENET System intelligently manages and delivers device and patient data whenever and wherever it's needed. Hospitals get advance notice of incoming critical patients. Care team members are activated in seconds to ensure patients receive timely care. Device readiness is tracked and managed with minimal human involvement.

Our continuum of patient information.

As patients make the journey from an emergent health event to post-event care, they generate multiple data streams that providers can use to make better decisions, deliver better care, and produce better outcomes. Physio-Control helps get the right information to the right people at the right time.

Solutions built for you.

Our products and services are designed to improve care throughout the entire continuum of patient care, but your unique needs require customized solutions. **Our Clinical Performance Solutions team is ready to help—call us today at 800-442-1142 to schedule a consultation.**

We also offer LIFEPAK 1000 devices which integrate just as smoothly into the Physio-Control ecosystem.

All claims valid as of June 2015.
