November 2008

Dear Physio-Control Customer,

This letter is to notify you of a change to the battery offerings for the LIFEPAK® 12 defibrillator/ monitor. The battery cell used in our LIFEPAK NiCd Battery with 1.7 amp hours of capacity (catalog # 11141-000027) was recently discontinued by our supplier. As such, we are no longer able to offer our customers this battery. Instead, we will be offering customers a similar battery that we expect will be available early in the next calendar year.

Until the new battery is available, we suggest our LIFEPAK 12 defibrillator/monitor customers purchase our higher capacity NiCd Battery with 2.4 amp hours of capacity (catalog # 11141-000026).

Although this battery has a list price of \$268, we are offering customers a promotional price of \$209 during this interim period. This \$209 promotional price is equivalent to the list price of the discontinued NiCd Battery (catalog #11141-000027). Please refer to code RP-NICD to receive this special offer.

For help ordering batteries and other Physio-Control products, please contact your local sales representative or call our customer support group at 800.442.1142, option 6. Alternatively, you can order products online 24 hours a day, 7 days a week at [www.store.physio-control.com](http://www.store.physio-control.com).
