

## Overview

The portable defibrillation pioneer, Physio-Control continues to innovate by developing unique medical solutions of the highest quality which predict or intervene in life threatening emergencies. Physio-Control tools have helped save countless victims worldwide of acute, treatable medical events.

Our LIFEPAK® defibrillators have been carried to the top of Mount Everest and launched in to orbit on the International Space Station. Physio-Control holds the #1 market share position with more than one million units in use today on fire rescue rigs, ambulances and hospital crash carts, and protecting thousands of communities worldwide. We are the global leader in professional emergency medical response solutions.

## Vision and Mission

Physio-Control has been a trailblazer in emergency medical care for more than 58 years, leading the industry in the development of innovative, scientifically-validated technologies to meet our customers' unique requirements.

Our evolution from a defibrillator manufacturer to an emergency medical solutions company, focused on providing a comprehensive *Systems of Care*, is critical to meeting our global customers' evolving needs across the prehospital, hospital and workplace & community segments. The Physio-Control System of Care consists of customizable solutions to help ensure that customers' devices, protocols and personnel are synchronized to effectively prepare for and respond to emergencies – and measure and their performance – with the goal of improving patient outcomes.

*Vision:* A world in which no one dies suddenly as a result of an acute, treatable medical event.

*Mission:* We make lifesaving tools for lifesaving teams...unique medical products of the highest quality that predict or intervene in life threatening emergencies.

## Our Core Values

- Passion for our Mission
- Commitment to being the best
- Belief in the power of TEAM

## Guiding Principles

- We are an emergency medical response company with a sense of urgency in everything we do
- We will ensure patient safety, product quality and our reputation as an ethical company always come first
- We relentlessly pursue superiority in products and service
- We collaborate to deliver results and celebrate our achievements
- We respect and value all members of our team, including our extended team of design, supply, services and sales partners
- We are committed to the well-being, job satisfaction and professional development of our global Team Members
- We recognize that continuous improvement and regulatory compliance are vital to our long-term success
- We strive to emulate the attributes of our global customers—service, dedication and humility
- We hold ourselves and each other accountable to our shared principles
- We are proud to be Physio-Control

Today our products are designed to work together to give emergency caregivers, in the hospital or on the street, more control of a critical event. Our path is clear. Our goal is simple. To develop emergency response tools of the highest quality to help clinicians and emergency responders, anywhere in the world, through the toughest kind of emergencies. We take our responsibilities seriously. When we say we work to help save lives, we mean it.

Physio-Control is headquartered in Redmond, Washington. The company has over 1,300 Team Members in 16 countries and operates in over 100 countries across six continents.

Physio-Control was acquired from Medtronic Corporation in 2012 by Bain Capital, and today is private, standalone company. We are currently the only U.S.-owned company in our industry.

## Products and Services

### Defibrillators/Monitors

---

#### **LIFEPAK CR® Plus Automated External Defibrillator**

Featuring the same advanced technology trusted by emergency medical professionals—yet simple to use—the fully automatic LIFEPAK CR Plus AED is designed specifically for the first person to respond to a victim of sudden cardiac arrest.

---

#### **LIFEPAK® 1000 Defibrillator**

The LIFEPAK 1000 Defibrillator is a powerful and compact device designed to treat cardiac arrest patients and provide continuous cardiac monitoring capabilities. Built-in flexibility allows the 1000 to be programmed for use by first responders or professionals and enables care providers to change protocols as standards of care evolve.

---

#### **LIFEPAK® 15 Monitor/Defibrillator**

The LIFEPAK 15 monitor/defibrillator is the standard in emergency care for ALS teams who want the most clinically innovative, operationally effective and LIFEPAK TOUGH™ device available today. The 15 offers sophisticated clinical technologies with a rich array of features—like the most powerful escalating energy available (up to 360J), advanced monitoring parameters and a completely upgradable platform.

---

#### **LIFEPAK® 20e Defibrillator/Monitor with CodeManagement Module™**

Clinically advanced and packed with power, the LIFEPAK 20e defibrillator/monitor is highly intuitive for first responders, and also skillfully combines AED function with manual capability so that ACLS-trained clinicians can quickly and easily deliver advanced therapeutic care. The CodeManagement Module adds waveform capnography and wireless connectivity to enhance your hospital's ability to effectively manage resuscitations from preparedness through review.

---

## Products and Services (continued)

### CPR Assistance

---

#### **LUCAS® 2 Chest Compression System**

Designed to provide effective, consistent and uninterrupted compressions according to AHA Guidelines, LUCAS can be used on adult patients in out-of-hospital and hospital settings.

#### **TrueCPR™ Coaching Device**

TrueCPR helps your team optimize their manual CPR performance using simple real-time and post-event feedback on the most critical resuscitation parameters. It accurately measures compression depth through proprietary Triaxial Field Induction technology.

### Information Management

---

#### **LIFENET® System**

The LIFENET System provides EMS and hospital care teams with reliable, quick access to clinical information through a secure, web-based platform, helping to improve patient care, flow and operational efficiency.

#### **CODE-STAT™ Data Review Software**

CODE-STAT data review software is a retrospective analysis tool that provides easy access to data, reports and post-event review.

### Support

---

#### **Physio-Control Service**

As the world's leading provider of defibrillation technology, Physio-Control understands our responsibility to maintain the reliability of our lifesaving defibrillator/monitors. We have over 100 field-based technical service representatives worldwide. Physio-Control is committed to service 24/7, and to returning a customer's call within two hours to quickly assess the problem and find the best solution (U.S.). If needed, a technical service representative will be on-site within 24 hours (U.S.).
