Not every cardiac emergency is the same. Neither is every responder. Your world demands flexibility—and that’s exactly what the LIFEPAK 1000 defibrillator from Physio-Control delivers.
The right tool at the right time.
Every time.

A first responder on the scene of an emergency. A BLS-trained team in the field or in a hospital waiting room. An ALS team taking over. No matter who they are or the environment they’re facing, with the LIFEPAK 1000 defibrillator they have just the device they need.

The rugged LIFEPAK 1000 defibrillator is an easy-to-use automated external defibrillator (AED) from the leader in defibrillation technology. But it’s also a defibrillator powerful and adaptable enough for professional responders, featuring advanced capabilities that can help improve lifesaving outcomes and speed the transition of cardiac patients to the next critical level of care.

First on the scene in an emergency, the LIFEPAK 1000 defibrillator can make the lifesaving difference for victims of sudden cardiac arrest.
For every trained responder, the opportunity to make a difference.

Picture the waiting room of a hospital or a corridor or a cafeteria. Now picture a visitor, patient or staff member struck down by sudden cardiac emergency. Who will respond first? It could be an ALS-trained member of the code team, but it’s just as likely to be a nurse or a receptionist trained in the use of the 1000. The LIFEPAK 1000 defibrillator is ready for all these possibilities, combining the simplicity of one-push defibrillation with clear guidance, both onscreen and from audio prompts.

When an ALS-trained professional does step in—either as a first responder or in transition to advanced care—the touch of a button puts the 1000 into manual override, with greater control over when to analyze and shock. Its ECG capabilities provide critical information to guide your protocol and deliver faster, more appropriate treatment, and the 1000 also stores this vital data for use in post-event review.

On patrol in a squad car or onboard a fire engine, the flexibility of the 1000 makes the story even simpler. BLS-trained responders have exactly the device they need, with powerful defibrillation—up to 360 joules—long battery life, and a rugged construction that can stand up to severe environments. And with cprMAX™ technology, BLS medical directors can configure the settings of the 1000 to match their teams’ CPR protocols.

When it’s time to hand off a patient to the care of hospital code teams or EMS ALS teams, the compatibility of the 1000 with other Physio-Control devices can speed transfer by allowing electrodes to remain on the patient while responders quickly and seamlessly reconnect to a more advanced monitor.

---

LIFEPAK 1000 Defibrillator and CODE-STAT 9.0 Data Review Software

The patient and performance data captured by the 1000 can be easily viewed, analyzed and managed with CODE-STAT 9.0 Data Review Software. This information can help future care by enabling teams to review performance and target training areas.
The LIFEPAK 1000 defibrillator at a glance.

**Rugged Construction**
Rigorously drop-tested device and protective case and bumpers.

**Vehicle Friendly**
Designed to ride along in any vehicle without damage from continuous vibrations and other movement.

**Flexible Power Options**
Choose between a rechargeable Lithium-ion (Li-ion) or non-rechargeable Lithium-Manganese Dioxide (Li MnO₂) battery for your device.

**360 Joules**
Can escalate defibrillation power to an industry-leading 360J.

**cprMAX™ Technology**
Minimizes CPR interruptions by allowing compressions to continue during AED charging.

**CPR Countdown Timer**
Provides direction for length of hands-on time for each CPR period based on system protocol.

**ECG Capability**
3-lead ECG function is available when needed.

**Shock Counter**
Digitally records and displays delivered shocks for added insight.

**Large Display**
Large, easy-to-read LCD screen provides more information at a glance.

**Compatible Technology**
Electrodes are fully compatible with all other LIFEPAK defibrillators and monitors.

**Programmable**
Adjust settings to match your team’s CPR and resuscitation protocols.

**Easy-To-Use AED**
Loud voice prompts and on-screen graphics provide guidance on applying electrodes and initiating a shock.
The LIFEPAK 1000 features our exclusive cprMAX technology, which gives you the flexibility to choose CPR settings that best accommodate your patient and CPR protocol requirements. The pre-shock CPR option allows adjustment of the CPR interval prior to the first shock, making the 1000 the only device that minimizes pre-shock pauses by allowing providers to continue compressions while the AED charges.

Recently published clinical data shows a relationship between increased compression fraction and survival to hospital discharge, and the 2010 AHA Guidelines place a strong emphasis on high-quality CPR. With the LIFEPAK 1000, you have more control over the CPR you provide in lifesaving settings than ever before.

LIFEPAK TOUGH™
Built for the harshest environments, the LIFEPAK 1000 is the toughest, most durable AED from Physio-Control. The device itself withstands rigorous drop-testing from any angle, and is enclosed in a highly protective case with bumpers. In addition, the 1000 has received an IP55 rating—the highest available AED rating signifying protection from external elements.

360 Joules
Like every LIFEPAK defibrillator from Physio-Control, the 1000 can escalate energy up to 360J. Studies show that for difficult-to-defibrillate patients, repeating 200J shocks yields significantly lower VF termination rates. And the 2010 AHA Guidelines note that rescuers may consider using escalating energy up to 360J if initial shocks at a lower dose aren’t working.

ALS Hand-off
The LIFEPAK 1000 is simple to use for any trained responder, but it also provides an easy, highly compatible transition to ALS care teams. The shock counter on the 1000 gives next level care teams insight into treatment provided. It has an available 3-lead ECG. And its electrodes are the same ones used on LIFEPAK ALS monitors—the brand of choice for more EMS teams across the country.
Getting responders ready with training tools.

Whether you are choosing the 1000 for the first time—or are adding new options—your Physio-Control representative will provide the introductory training you need to get the most from your LIFEPAK 1000 defibrillator. Additional training solutions are also available.

**Trainer 1000**

With the same screen messages, audible tones and voice prompts as those found in the 1000, the Trainer 1000 provides realistic training without live energy. It helps guide users through simulated analysis, energy delivery and prompted CPR intervals—without taking your LIFEPAK 1000 defibrillator out of service for hands-on training. Includes simulated cprMAX technology.

**Training Simulation Package**

For use with your LIFEPAK 1000 defibrillator, this package includes a patient simulator, spare battery and training electrodes, all at an affordable price. Without purchasing a separate training unit, responders can hone their AED skills, practice recognizing and responding to different ECG rhythms, and learn about the advanced capabilities of the 1000 with live-switching from ECG Monitoring Mode to Manual Mode.

**AED Challenge**

An interactive, online refresher training tool for LIFEPAK automated external defibrillators, AED Challenge® enables you to stay up-to-speed with your AED/CPR skills when and where you choose. Real-life scenarios give you regular practice and immediate feedback, and administrators can adjust and track training with the included learning management tools. AHA 2010 Guidelines consistent.

**Committed to Service**

With the largest and best-trained network of technical service representatives in the industry, Physio-Control proudly takes the lead in offering LIFEPAK 1000 defibrillator customers best-in-class technical support for their devices. On call 24-hours a day, 7-days a week in North America, our agents strive to return every phone call within two hours, working with you to quickly assess your particular problem and find the best solution. Our Redmond, Washington-based technical support center is also available to trouble-shoot problems by phone.

**Meets your Needs**

The flexible LIFEPAK 1000 defibrillator from Physio-Control is your chance to give first responders exactly the lifesaving device they need—and give advanced responders the information and capabilities they can use to change outcomes for patients.

Contact your Physio-Control sales representative or call 1.800.442.1142 to find out more.
Hospitals

The LIFEPAK 1000 defibrillator can be an important part of a comprehensive AED solution for your facility. Contact us for a free Heart Safe Hospital Assessment and see how the 1000 can be a part of a comprehensive AED solution for your facility. We’ll analyze your existing equipment and resuscitation practices and recommend steps for aligning your cardiac response with the latest guidelines and clinical evidence—including AHA.
Physio-Control Family of Products

Defibrillators/Monitors

**LIFEPAK CR® Plus Automated External Defibrillator (AED)**
Featuring the same advanced technology trusted by emergency medical professionals—yet simple to use—the fully automatic LIFEPAK CR Plus AED is designed specifically for the first person to respond to a victim of sudden cardiac arrest (SCA).

**LIFEPAK® 15 Monitor/Defibrillator**
The LIFEPAK 15 monitor/defibrillator is the standard in emergency care for ALS teams who want the most clinically innovative, operationally effective and LIFEPAK TOUGH™ device available today. The 15 offers sophisticated clinical technologies with a rich array of features—like the most powerful escalating energy available (up to 360J), advanced monitoring parameters and a completely upgradable platform.

**LIFEPAK® 20e Defibrillator/Monitor with CodeManagement Module®**
Clinically advanced and packed with power, the LIFEPAK 20e defibrillator/monitor is highly intuitive for first responders, and also skillfully combines AED function with manual capability so that ACLS-trained clinicians can quickly and easily deliver advanced therapeutic care. The CodeManagement Module adds waveform capnography and wireless connectivity to enhance your hospital’s ability to effectively manage resuscitations from preparedness through review.

CPR Assistance

**LUCAS® 2 Chest Compression System**
Designed to provide effective, consistent and uninterrupted compressions according to AHA Guidelines, LUCAS can be used on adult patients in out-of-hospital and hospital settings.

**TrueCPR™ Coaching Device**
TrueCPR helps your team optimize their manual CPR performance using simple real-time and post-event feedback on the most critical resuscitation parameters. It accurately measures compression depth through proprietary Triaxial Field Induction technology.

Data Solutions

**LIFENET® System**
The LIFENET System provides EMS and hospital care teams with reliable, quick access to clinical information through a secure, web-based platform, helping to improve patient care, flow and operational efficiency.

**CODE-STAT™ Data Review Software**
CODE-STAT data review software is a retrospective analysis tool that provides easy access to data, reports and post-event review.
DEFIBRILLATOR

All specifications are at 20°C unless otherwise specified.

### Waveform
- Biphasic truncated exponential with voltage and duration compensation for patient impedance.

### Energy Sequence
- User configurable. 150 joules – 360 joules. Default energy output settings are 200, 300, 360 joules. 360 joules for every shock thereafter.

### Charge Time
- With new, nonrechargeable battery pack: 200 joules in less than 7 seconds (360 joules in less than 12 seconds).

### 3-Wire (Lead II) Monitoring Capability
- 7 seconds (360 joules in less than 12 seconds).

### Device Software
- Field upgradable.

### Infant/Child Reduced Energy Defibrillation Electrodes
- Reduces selected energy by a factor of 4. Intended for use only with children up to 8 years of age or 25 kg (55 lbs).

### Electrical Protection
- Input protected against high voltage defibrillator pulses internally powered equipment IEC 60601-1.

### Waveform Amplitude
- 0.55 Hz to 21 Hz (-3 dB), nominal.

### Waveform Viewing Time
- 15, 30, 45, 60, 90, 120, 180 seconds.

### Waveform Sweep Speed
- 25 mm/sec for ECG, nominal.

### Alarm Sensitivity
- Constant Current/Constant Voltage within temperature limits.

### Display
- Backlit LCD displays number of shocks delivered, elapsed time, text and graphics of heart rhythm and optional ECG.

### Nonrechargeable Battery
- Lithium Manganese Dioxide (Li/MnO2), 12.0 V, 4.5 Ah

### Lithium-ion Rechargeable Battery
- 11.1 V, 4.8 Ah, 53 Wh

### Weight
- Always, After Every NSA, After Second NSA, Never

### Low Battery Indicator
- At least 30 200-joule shocks or 75 minutes of operating time remain when low battery is first indicated.

### Event Documentation and Communication
- CODE-STAT™ 6.1 Medical Informatics System, DT Express™ 2.1 Information Management System or higher.

### Batteries
- Rechargeable Battery: Lithium-ion, 11.1 V, 4.8 Ah, 53 Wh
- Nonrechargeable Battery: Lithium Manganese Dioxide (Li/MnO2), 12.0 V, 4.5 Ah

### Weight
- 0.45 kg (1.0 lb), maximum

### Standby Life
- A new fully-charged battery provides device power for 5 years.

### Low Battery Indicator
- At least 30 200-joule shocks or 75 minutes of operating time remain when low battery is first indicated.

### Battery Charger
- Supported Battery – Lithium-ion Rechargeable Battery, 11.1 V, 4.8 Ah, 53 Wh
- Electrical – External Power Supply: 100-240VAC, 50/60Hz

### Weight
- 0.5 kg

### Physical Characteristics
- Height: 8.7 cm (3.4 in).
- Width: 23.4 cm (9.2 in).
- Depth: 27.7 cm (10.9 in).
- Weight: 3.2 kg (7.1 lbs) with one set of REDi-PAK electrodes and one nonrechargeable battery.
