LIFEPAK® 15 MONITOR/DEFIBRILLATOR

For Emergency Medical Services
When you respond to emergencies, you need the most advanced monitor/defibrillator that sets the new standard in innovation, operations and toughness.
The LIFEPAK 15 monitor/defibrillator delivers.

Physio-Control defibrillators have set the standard for over 55 years, and the latest version of the LIFEPAK® 15 monitor/defibrillator raises the bar. As our most advanced emergency response monitor/defibrillator, the LIFEPAK 15 device balances sophisticated clinical technologies and supreme ease of use in a device that’s tough enough to stand up to your most challenging environments. Evolving from its original platform, the 15 adds new features—temperature monitoring and external power—to complement existing features which include 360J energy and 12-lead ECG transmission. And that means your team can be even more effective.

A LIFEPAK device never stands on its own—and the LIFEPAK 15 monitor is no different. Physio-Control is committed to providing innovative solutions for emergency response care, from first responders to throughout the hospital.

Our products have helped save tens of thousands of lives. We’re proud to continue this work with new features in the LIFEPAK 15 monitor/defibrillator.
The new standard in clinical innovation.

The pioneer in portable defibrillation and monitoring technology, Physio-Control is committed to creating technologies and devices that change the way you provide emergency care. You can see the results in the latest version of the LIFEPAK 15 monitor/defibrillator, which sets a new standard in innovation—yet again.
Advanced monitoring parameters
With more monitoring capabilities than any other monitor/defibrillator, the 15 gives you EtCO₂ with continuous waveform capture*. Masimo® Rainbow® technology helps you detect hard-to-diagnose conditions and improve patient care with noninvasive monitoring of carbon monoxide, SpO₂ and methemoglobin. In addition, the 15 now offers temperature monitoring—and like other data, you can transmit it to other systems, trend it, or display for post-event review in CODE-STAT™ data review software.

Advanced support for treating cardiac patients
The 15 continuously monitors all 12 leads in the background and alerts you to changes using the ST-Segment trend monitoring feature, after acquiring the initial 12-lead. Additionally, STJ values are now included on the 12-lead printout to help you identify changes. The 15 also works seamlessly with the web-based LIFENET System 5.0, so you can automatically share critical patient data with multiple patient care teams.

Full energy up to 360 joules, for every patient who needs it
The LIFEPAK 15 monitor/defibrillator features 360J biphasic technology, which gives you the option of escalating your energy dose up to 360J for difficult-to-defibrillate patients. Why is this necessary? Recent studies have shown that refibrillation is common among VF cardiac arrest patients and that defibrillation of recurring episodes of VF is increasingly difficult. Another recent randomized controlled clinical trial shows the rate of VF termination was higher with an escalating higher energy regimen of 200J and over.

Proven CPR guidance and post event review
The CPR Metronome in the LIFEPAK 15 monitor uses audible prompts to guide you without distracting vocal critique. A metronome has been a feature that has been demonstrated to help professionals perform compressions and ventilations within the recommended range of the 2010 AHA Guidelines. Post-event review of CPR data and delivering feedback to the team has been shown to be effective in improving CPR quality in both hospital and out-of-hospital. And by transmitting code data directly to CODE-STAT Data Review software, EMS personnel can review CPR statistics and provide training and feedback where it is most needed.
The new standard in operational effectiveness.

Flexible, connected and easy to use, the LIFEPAK 15 monitor/defibrillator was designed based on the feedback and needs specific to working in the field.

**Dual-mode LCD screen with SunVue™ display**
Switch from full-color to high-contrast SunVue mode with a single touch for the best full-glare view in the industry. A large screen (8.4 inches diagonally) and full-color display provide maximum viewability from all angles.

**Flexible power options**
Choose between external worldwide AC or DC power, or use the latest Lithium-ion dual battery technology for up to six hours of power. The LIFEPAK 15 monitor’s two-battery system requires no maintenance or conditioning, and allows you to charge batteries in the device. In addition, you can track the status and service life of your batteries using LIFENET™ Asset, part of the LIFENET System data network.

**Data connectivity**
The 15 collects code summaries and equipment status data along with critical clinical information as you treat patients. Using LIFENET Connect, part of the LIFENET System data network, the code summaries can be sent directly to your quality improvement team for review with CODE-STAT Data Review Software. Your equipment manager can also view equipment status on the LIFENET System 5.0 using LIFENET Asset and alert you to any potential issues.

**Upgradable platform**
The 15 platform is flexible enough to adapt to evolving protocols and new guidelines, and can be upgraded as you’re ready to deliver new capabilities. With more processing power and speed, the 15 is designed to grow as your needs change, helping you avoid costly premature replacements.

**Attention to detail**
The LIFEPAK 15 monitor is designed based on field feedback to make it a more effective tool. The 15 has a larger handle for easier handoffs, an easy to clean keypad, and a common interface to the LIFEPAK 12 defibrillator/monitor that helps reduce training.
The new standard in toughness.

We believe LIFEPAK equipment should live up to the highest expectations of those working in the harshest settings. The 15 is LIFEPAK TOUGH, with improved ruggedness and durability you can rely on.

---

**Works when dropped, kicked, soaked or dirty**
The LIFEPAK 15 monitor/defibrillator passes 30-inch drop tests, which is equal to falling off a cot or dropping it in transit. And with an IP44 rating, it doesn’t matter how wet or dirty it gets, so you can keep working in steady wind, rain and other harsh environments.

---

**Toughened inside and out**
We heard from emergency response teams that they wanted a tougher device—so we added a shock-absorbing handle, a double-layer screen that can take a beating from doorknobs and cot handles, and redesigned cable connections for confident monitoring and therapy delivery.

---

**Unmatched field service**
The unit’s self-checking feature alerts our service team if the device needs attention. Our on site maintenance and repair, access to original manufacturer parts, and highly trained, experienced service representatives give you the peace of mind that your LIFEPAK 15 monitor will be ready when you need it.*

---

* A variety of customized service options are available.
Integrated Carbon Monoxide and Methemoglobin monitoring.

12-lead ECG transmissions via the LIFENET System and ST segment trend monitoring make the LIFEPAK 15 device a vital part of decreasing EMS-to-Balloon (E2B) response times.

The latest Lithium-ion battery technology and dual battery system allows for nearly six hour run time, automatic switching between external power and batteries, and an approximate two-year replacement cycle.

Easy one-touch Bluetooth® data transmission.

On-screen temperature display in either Celsius or Fahrenheit.

Large screen for better visibility and easy monitoring and one touch to switch from LCD color view to SunVue mode for best viewing in sunlight.
CPR Metronome, a proven technology that actively guides users to a consistent compression rate without the need for extra external hardware.

Integrated Oridion EtCO₂ provides waveform ranges as low as 0–20 mmHg to help identify ROSC or gauge CPR quality, consistent with the AHA guidelines.

Ergonomically designed handle has built-in shock absorbers for cushion and fits two gloved hands for easy pass off.

Redesigned cable connector gives you the confidence for secure therapy delivery.

The LIFEPAK 15 monitor/defibrillator at a glance.
For more than 55 years, Physio-Control has been developing technologies and designing devices that are legendary among first response professionals, clinical care providers, and the community.
A legacy of trust.

Since we were founded in 1955, Physio-Control has been giving medical professionals around the world legendary quality and constant innovation. Our LIFEPAK devices have been carried to the top of Mount Everest. They’ve been launched into orbit on the International Space Station. And you’ll find more than half a million units in use today on fire rescue rigs, ambulances, and hospital crash carts worldwide.

We are inspired and informed by the rescuers who choose our products to save lives. The knowledge gained from working with some of the world’s largest EMS organizations helps us constantly improve clinical standards and durability.

Today, we continue our legacy of innovation with leading new technologies that improve patient care. Our 360J biphasic technology gives patients the best chance at survival. Our secure, web-based flow of ECG data helps improve STEMI patient outcomes. And our carbon monoxide monitoring helps catch the number one cause of poisoning deaths.

From the streets to the emergency room to the administrative office, we offer a powerful suite of solutions that range from code response to quality control analysis. And even as we bring ground-breaking products to the market, some things don’t change. As always, when you choose our products, you don’t just get a device. You also get the most comprehensive warranty in the business, industry-leading technical service, and a partner with over 55 years of experience in emergency care.

For more information about the LIFEPAK 15 monitor/defibrillator—and how it can help you do what you do best—please contact your local Physio-Control representative or visit www.physio-control.com.
Physio-Control Family of Products and Services

Defibrillators/Monitors

**LIFEPAK CR® Plus Automated External Defibrillator**
Featuring the same advanced technology trusted by emergency medical professionals—yet simple to use—the fully-automatic LIFEPAK CR Plus AED is designed specifically for the first person to respond to a victim of sudden cardiac arrest.

**LIFEPAK 1000 Defibrillator**
The LIFEPAK 1000 Defibrillator is a powerful and compact device designed to treat cardiac arrest patients and provide continuous cardiac monitoring capabilities. Built-in flexibility allows the 1000 to be programmed for use by first responders or professionals and enables care providers to change protocols as standards of care evolve.

**LIFEPAK 15 Monitor/Defibrillator**
The LIFEPAK 15 monitor/defibrillator is the new standard in emergency care for ALS teams who want the most clinically innovative, operationally effective, and LIFEPAK TOUGH device available today.

**LIFEPAK 20e Defibrillator/Monitor**
Clinically advanced and packed with power, the LIFEPAK 20e defibrillator/monitor is highly intuitive for first responders, and also skillfully combines AED function with manual capability so that ACLS-trained clinicians can quickly and easily deliver advanced therapeutic care.

CPR Assistance

**LUCAS® Chest Compression System**
Designed to provide effective, consistent, and uninterrupted compressions according to AHA Guidelines, LUCAS can be used on adult patients in out-of-hospital and hospital settings.
LIFENET® System
The LIFENET System provides EMS and hospital care teams with reliable, quick access to clinical information through a secure, web-based platform, helping to improve patient care flow and operational efficiency.

CODE-STAT™ 9.0 Data Review Software
CODE-STAT 9.0 data review software is a retrospective analysis tool that provides easy access to data, reports, and post-event review.

ReadyLink™ 12-Lead ECG
Handheld, portable, and easy-to-use, the revolutionary ReadyLink 12-Lead ECG quickly and easily captures and transmits 12-lead data to hospitals through the LIFENET System. Doctors can provide chest pain decision support, so teams in the field know exactly what kind of care the patient needs and where to take them.

Physio-Control Service
As the world’s leading provider of defibrillation technology, Physio-Control understands our responsibility to maintain the reliability of our lifesaving defibrillator/monitors. We have over 100 field-based technical service representatives worldwide. Physio-Control is committed to service 24/7, and to returning a customer’s call within two hours to quickly assess the problem and find the best solution (U.S.). If needed, a technical service representative will be on-site within 24 hours (U.S.).
The LIFEPAK 15 monitor/defibrillator has six main operating modes:

- **AED Mode:** for automated ECG analysis and a prompted treatment protocol for patients in cardiac arrest.
- **Manual Mode:** for performing manual defibrillation, synchronized cardioversion, noninvasive pacing, and ECG and vital sign monitoring.
- **Archive Mode:** for accessing stored patient information.
- **Setup Mode:** for changing default settings of the operating functions.
- **Service Mode:** for authorized personnel to perform diagnostic tests and calibrations.
- **Demo Mode:** for simulated waveforms and trend graphs for demonstration purposes.

**PHYSICAL CHARACTERISTICS**

**Weight:**
- Basic monitor/defibrillator with new roll paper and two batteries installed: 8.6 kg (18.8 lb)
- Fully featured monitor/defibrillator with new roll paper and two batteries installed: 9.1 kg (20.1 lb)

**Lithium-ion battery:** 0.59 kg (1.3 lb)

**Accessory Bags and Shoulder Strap:** 0.95 kg (2.1 lb)

**Height:** 31.7 cm (12.5 in)

**Width:** 40.1 cm (15.8 in)

**Depth:** 23.1 cm (9.1 in)

**TOTAL WEIGHT:** 5.2 kg (11.5 lb)

**ACKERING SIZE:** 33.4 cm (13.1 in) wide x 23.1 cm (9.1 in) high

**DATA MANAGEMENT**

The device captures and stores patient data, events (including waveforms and annotations), and continuous waveform and patient impedance records in internal memory. The user can select and print reports, and transfer the stored information via a wired connection.

- **Report Types:**
  - Three format types of CODE SUMMARY™ critical event record: short, medium, and long
  - 12-lead ECG with STEMI statements
  - Continuous Waveform (transfer only)
  - Trend Summary
  - Vital Sign Summary
  - Snapshot

**Memory Capacity:** Total capacity is 360 minutes of continuous ECG, 90 minutes of continuous data from all channels, or 400 single waveform events.

**Maximum memory capacity for a single patient includes up to 200 single waveform reports and 90 minutes of continuous ECG.**

**COMMUNICATIONS**

The device is capable of transferring data records by wired or wireless connection. This device complies with Part 15 of the FCC rules, and its operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Serial Port RS232 communication + 12V available

Limited to devices drawing maximum 0.5 A current

Bluetooth® technology provides short-range wireless communication with other Bluetooth-enabled devices.

**MONITOR**

**ECG**

ECG is monitored via several cable arrangements:

- A 3-wire cable is used for 3-lead ECG monitoring.
- A 5-wire cable is used for 7-lead ECG monitoring.
- A 10-wire cable is used for 12-lead ECG acquisition. When the chest electrodes are removed, the 10-wire cable functions as a 4-wire cable.

**Standard paddles or QUIK-COMBO pacing/defibrillation/ECG electrodes are used for paddles lead monitoring.**

**Frequency Response:**
- Monitor: 0.5 to 40 Hz or 1 to 30 Hz
- Paddles: 2.5 to 30 Hz
- 12-lead ECG diagnostic: 0.05 to 150 Hz

**Lead Selection:**
- Leads I, II, III, (3-wire ECG cable)
- Leads I, II, III, AVR, AVL, and AVF acquired simultaneously (4-wire ECG cable)
- Leads I, II, III, AVR, AVL, AF, V1, V2, V3, V4, V5, and V6 acquired simultaneously (6-wire ECG cable)

**ECG size:** 4, 3, 2.5, 2, 1.5, 1, 0.5, 0.25 cm/mV

**Heart Rate Display:**
- 20-300 bpm digital display

**Saturations:**
- Sp02 Saturation Range: 70–100% (0–69% unspecified)
- SpMet Saturation Range: 0 to 100%

**Accuracy:**
- Sp02: ±2 digits (during motion conditions)
- Sp02: ±2% of reading, whichever is greater

**Respiration Rate Accuracy:**
- ±2 breaths per minute or ±2% of reading, whichever is greater

**Blood Pressure Measurement Time:**
- 20 seconds

**Pulse Rate Accuracy:**
- ±0.5 pulses per minute

**CO2**

- **CO2 Range:** 0 to 99 mmHg (0 to 13.2 kPa)
- **Units:** mmHg, kPa

**Accuracy:**
- ±2% of reading, whichever is greater

**Pressure Range:** 0 to 99 cmHg

**Temperature Range:** 24.8°C to 45.2°C

**Resolution:** 0.1°C

**Accuracy:** ±0.2°C including sensor

**Rechargeable Temperature Cable:** 5 foot or 10 foot

**Disposible Sensor Types:** Surface-Skin, Esophageal/Rectal

**Sp02/SpC0/SpMet**

- **Sp02 Sensitivity User selectable:** ±3 digits
- **SpC0 Sensitivity User selectable:** ±3 digits
- **SpMet Sensitivity User selectable:** ±3 digits

**Display**

- **Sp02 Update Averaging Rate User selectable:** ±3 digits
- **SpC0 Update Averaging Rate User selectable:** ±3 digits
- **SpMet Update Averaging Rate User selectable:** ±3 digits

**Data Management**

- **Data Management:** The device captures and stores patient data, events (including waveforms and annotations), and continuous waveform and patient impedance records in internal memory.
- The user can select and print reports, and transfer the stored information via a wired connection.

**Display**

**Resolution:** display type 640 dot x 480 dot color backlit LCD

**User Selectable Display Mode:** full color or SunVue™ display high contrast

**Display:** a minimum of 5 seconds of ECG and alphanumeric values for patient numbers, device instructions, or prompts

**Display:** up to three waveforms

**Waveform Display Sweep Speed:** 25 mm/sec for ECG, Sp02, IP, and 12.5 mm/sec for CO2

**ELECTRICAL SPECIFICATIONS**

**Electrode Impedance:**
- Sp02: ±1 MΩ
- SpMet: ±1 MΩ

**Electrode Impedance:**
- Sp02: ±1 MΩ
- SpMet: ±1 MΩ

**Paddles Impedance:**
- ±1 MΩ

**Common Mode Rejection (CMRR):**
- ECG: Leads 90 dB at 50/60 Hz

**Sp02/SpC0/SpMet Sensors:**
- MMS® sensors including RAINBOW® sensors
- NELLCOR® sensors when used with the MMS®

**Sp02®**

- **Sp02 Displayed Saturation Range:** “<50” for levels below 50%
- **Saturation Accuracy:** 70–100% (0–69% unspecified)
- **Adulst/Pediatric:**
  - ±2 digits (during no motion conditions)
  - ±3 digits (during motion conditions)

**SpC0®**

- **SpC0 Concentration Display Range:** 0 to 100%
- **SpC0 Accuracy:** ±1 digit
Defibrillator

**Biphasic Waveform:** Biphasic Truncated Exponential

The following specifications apply from 25 to 200 ohms, unless otherwise specified:

- **Energy Accuracy:** ±1 joule or ±10% of setting, whichever is greater, into 50 ohms, ±2 joules or ±15% of setting, whichever is greater, into 25–175 ohms.
- **Voltage Compensation:** Active when disposable therapy electrodes are attached. Energy output within ±5% or ±1 joule.
- **Frequency Response:** 40 to 170 PPM
- **Delay:** 8 seconds
- **Autoprint:** Waveform events print automatically
- **Paper Size:** 100 mm (3.9 in)
- **Print Speed:** 100 mm (3.9 in)

**Battery**

- **Battery Type:** Lithium-ion
- **Weight:** 0.59 kg (1.3 lb)
- **Voltage:** 11.1V typical
- **Capacity (rated):** 5.7 amp hours
- **Charge Time (with fully depleted battery):** 4 hours and 15 minutes (typical)
- **Battery indicators:** Each battery has a fuel gauge that indicates its approximate charge. A fuel gauge that shows two or fewer LEDs after a charge cycle indicates that the battery should be replaced.

**Charging Temperature Range:** 0° to 50°C (32° to 122°F)

**Operating Temperature Range:** 0° to 50°C (32° to 122°F)

**Short Term (<1 week) Storage Temperature Range:** -20° to 60°C (4° to 140°F)

**Long Term (>1 week) Storage Temperature Range:** 20° to 25°C (68° to 77°F)

**Operating and Storage Humidity Range:** 5 to 95% relative humidity, non-condensing

**Power**

- **Power Adapters:** AC or DC
- **Power Adapters provide operation and battery charging from external AC or DC power:***
  - **Full functionality with or without batteries when connected to external AC/DC**
  - **Typical battery charge time while installed in LIFEPAK 15 device is 190 minutes**
  - **Indicators: external power indicator, battery charging indicator**
- **Dual battery:** Capability with automatic switching
- **Low battery indication and message:** Low battery fuel gauge indication and low battery message in status area for each battery
- **Replace battery indication and message:** Replace battery fuel gauge indication, audio tones and replace battery message in the status area for each battery

**Alarms**

- **Apnea Alarm:** Activates continuous (CPSS) monitoring in Manual mode
- **Activity Monitor Alarm:** Occurs when 30 seconds has elapsed since last detected respiration
- **Heart Rate Alarm Limit Range:** Upper, 100–250 bpm; lower, 30–150 bpm

**Printer**

- **Prints continuous strip of the displayed patient information and reports**
- **Paper Size:** 100 mm (3.9 in)
- **Print Speed:** 25 mm/sec or 12.5 mm/sec
- **Optional:** 50 mm/sec time base for 12-lead ECG reports
- **Delay:** 8 seconds
- **Autoprint:** Waveform events print automatically
- **Frequency Response:**
  - Diagnostic: 0.05 to 150 Hz or 0.05 to 40 Hz
  - Monitor: 0.67 Hz to 40 Hz or 1 to 30 Hz

**Pacemaker**

- **Pacing Mode:** Demand or non-demand rate and current defaults
- **Pacing Rate:** 40 to 170 PPM
- **Rate Accuracy:** ±1.5% over entire range
- **Output Waveform:** Monophasic, truncated exponential current pulse (20 ±1 msce)
- **Output Current:** 0 to 200 mA
- **Pause:** Pacing pulse frequency reduced by a factor of 4 when activated
- **Refractory Period:** 180 to 280 msec (function of rate)

**Interventricular Algorithm**

University of Glasgow 12-Lead Interpretive Algorithm:

- **Display Choices:**
  - HR, PR (SpO2), PR (NIBP), SpO2 (%), SpCO (%), SpMet (%), CO2 (EtCO2/FiCO2), RR (CO2), NIBP, IP1, IP2, ST

**Interpretive Algorithm**

12-Lead Interpretive Algorithm: University of Glasgow 12-Lead ECG Analysis Program, includes AMI and STEMI statements

**Shock Ready Time:** Using a fully charged battery at normal room temperature, the device is ready to shock within 20 seconds if the initial rhythm finding is “SHOCK ADVISED”

Biphasic Output: Energy Shock levels ranging from 150–360 joules with same or greater energy level for each successive shock

**CPRMAX™ Technology:** In AED mode, cprMAX™ technology provides a method of maximizing the CPR time that a patient receives, with the overall goal of improving the rate of survival of patients treated with AEDs.

**Setup Options:**

- **Auto Analyze:** Allows for auto analysis. Options are OFF, AFTER 1ST SHOCK
- **Initial CPR:** Allows the user to be prompted for CPR for a period of time prior to other activity. Options are OFF, ANALYZE FIRST, CPR FIRST
- **Initial CPR Time:** Time interval for Initial CPR. Options are 15, 30, 45, 60, 90, 120, and 180 seconds.
- **Pre-Shock CPR:** Allows the user to be prompted for CPR while the device is charging. Options are OFF, 15, 30 seconds.
- **Pulse Check:** Allows the user to be prompted for a pulse check at various times. Options are ALWAYS, AFTER EVERY SECOND NSA, AFTER EVERY NSA, NEVER
- **Stacked Shocks:** Allows for CPR after 3 consecutive shocks or after a single shock. Options are OFF, ON
- **CPR Time:** 1 or 2 User selectable times for CPR. Options are 15, 30, 45, 60, 90, 120, 180 seconds and 30 minutes.

**Delay**

- **Standard paddles (optional)**
- **QUIK-COMBO cable (not including electrode assembly).**

**Environment**

**Temperature Range:**

- **Operating Temperature:** 0° to 45°C (32° to 113°F); -20°C (-4°F) for 1 hour after storage at room temperature; 60°C (140°F) for 1 hour after storage at room temperature
- **Storage Temperature:** -20° to 65°C (4° to 149°F) except therapy electrodes and batteries
- **Relative Humidity, Operating:** 5 to 95%, non-condensing
- **Relative Humidity, Storage:** 10 to 95%, non-condensing
- **Atmospheric Pressure:** Operating: -382 to 4,572 m (-1,253 to 15,000 ft); Non-operating at: 5 drops on each side from 18 inches onto a hard surface or 5 drops on each side from 12 inches onto a hard surface

**Water Resistance, Operating:**

- **NIBP:** 15 to 95%, non-condensing
- **Temperature Range:**
  - **Operating Temperature:** 0° to 50°C (32° to 122°F)
  - **Charging Temperature Range:** 0° to 60°C (32° to 140°F)

**Power Adapters**

- **AC or DC Power Adapters provide operation and battery charging from external AC or DC power:**
  - **Full functionality with or without batteries when connected to external AC/DC**
  - **Typical battery charge time while installed in LIFEPAK 15 device is 190 minutes**
  - **Indicators: external power indicator, battery charging indicator**
- **Dual battery:** Capability with automatic switching

**Low battery indication and message:** Low battery fuel gauge indication and low battery message in status area for each battery

**Replace battery indication and message:** Replace battery fuel gauge indication, audio tones and replace battery message in the status area for each battery

**Battery Capacity**

- **For two, new fully-charged batteries, 20°F (68°F)**
