

LUCAS® 3 Chest Compression System

Myth Busted! The LUCAS device does fit large patients!

Weight:

180 lbs / 82 kg

Height:

6 ft / 183 cm

Weight:

330 lbs / 150 kg

Height:

6 ft, 5 in / 196 cm

Weight:

320 lbs / 145 kg

Height:

5 ft, 10 in / 178 cm

Proper Placement is on Upper Chest

Do not assume the LUCAS Chest Compression System can't fit larger patients. Many large patients carry their weight through their mid-section. When LUCAS is properly applied, it rests over the upper chest or sternum, with enough room for the compressor to give compressions according to guidelines. As long as the unit snaps into the backboard and the suction cup does not compress the patient's chest in the start position, it will operate as intended.

Patients Eligible for Treatment:

- Sternum height of 6.7 to 11.9 inches / 170 to 303 mm
- Maximum chest width: 17.7 inches / 45 mm

Using the LUCAS device is not restricted by patient weight.
