

HEART SAFE SOLUTION

Protecting the heart
of your organization.

AED program implementation and management

You've decided to install workplace AEDs.

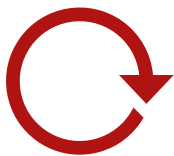

Don't stop there.

Installing automated external defibrillators (AEDs) is an important step to treat your people in the event of a sudden cardiac arrest (SCA) event. But it's easy to underestimate the specialized skill required to manage this lifesaving equipment properly. Most organizations don't have the time to start and maintain an AED management program or to keep up with regulatory requirements. And if you don't have a safety manager on staff or if you have multiple locations, the challenge is even greater.

The Physio-Control Heart Safe Solution is designed to help.

The Heart Safe Solution AED management program guides you every step of the way—from implementation and training, to readiness and maintenance, to support and review. All delivered with a people-to-people focus and backed by half a century of pioneering AED technology, products and programs. Heart Safe Solution is a comprehensive program that lets you focus on your business, knowing that this critical component of your safety plan is ready.

**Protect your most valuable assets—
your people—with a solution that is:**

Complete

We provide a comprehensive AED implementation and management program, including expert guidance, training, tools, and ongoing support.

Flexible

Heart Safe Solution AED program management is adaptable and customized to fit your organization's support needs and budget requirements.

Personalized

Our specialists assist you personally, including a dedicated Heart Safe Certified Account Representative, expert trainers, and onsite services by factory-certified technicians.

1.

Get started on the right track.

Optimal set-up of your AEDs will maximize your investment and your peace of mind.

Implementation support includes:

- **Program development:** Overall coordination, tools and procedures and establishing your Heart Safe Central account.
- **AED placement support:** Recommend the number and placement of AEDs and manage ordering and shipment to all sites.
- **Medical direction:** AED prescriptions and ongoing medical oversight.
- **State registration:** File required forms for each of your locations and provide required official notifications.
- **CPR/AED training:** Identify appropriate training curriculum (AHA, ARC, ASHI), recruit volunteers and provide ongoing courses through our national network of certified trainers.

2.

Keep your workplace ready to save lives.

A dedicated Heart Safe Certified Account Representative takes care of the program so you can focus on your organization.

Maintenance support includes:

- **Heart Safe Central online program management:** Round-the-clock access to track status of your AED program and equipment plus monthly reminders to check and report AED status.
- **Automatic supply replenishment:** Automatically receive replenishment supplies and track when supplies have been replaced.
- **Refresher training:** Live CPR/AED classroom sessions as required plus access to AED Challenge®, an interactive, online tool to refresh skills when and where you choose.
- **Ongoing support:** 24/7 AED-related hotline.

3.

Get your people and equipment refueled.

We provide both technical and emotional support during the post-event period.

Post-event support includes:

- **Device check and supply replenishment:** Our trained service engineers inspect and test the AED, replenish supplies and get it back into service—all onsite, so you don't have to worry about shipping and downtime.
- **Data download and clinical review:** Patient data transfer in accordance with HIPAA guidelines, clinical review of the event by a medical director and reporting in accordance with local regulations.
- **Hero program:** Communications guidance and acknowledgment materials like t-shirts and certificates for responders and survivors.
- **Optional onsite employee counseling is available.**

Having workplace AEDs is a great start.

Take the next step to make sure they are set up for lifesaving success and managed by experts.
